

# Why is PJ sick?

- Before we proceed with an exam to help narrow our differential diagnosis, watch this 5 minute video to help better contextualize the exam, then proceed with the case:

[How do B cells develop?](#) (Video 2 of 5)

# What would you like to examine?

- For each immunodeficiency, think about what key exam findings would help rule in or rule out this disease. At this point, think about big categories of immune deficiencies, with examples of each.
- Go to the next slide for the exam findings, with some comments on what each finding helps rule in / rule out.
