

# Physical Exam - Part 1

- Temp: 98.8°F, BP 101/63 mmHg, Pulse 97, Ht 101.6 cm (40"), Wt 15 kg (33 lb 1 oz)

- 50th percentile for height and 40th percentile for weight. No unexplained fever or Failure To Thrive

• Gen: WDVN well-appearing in NAD

• **Head: Normative without dysmorphic features**

- Facial dysmorphic features can be seen in DiGeorge Syndrome and of course other genetic diseases

- **Ears: TMs visualized with diffusion**

- Scarred TMs would suggest severe/chronic ear infections

• **Eyes: PERLA, EOMI, no scleral injection**

• **Noise: Normal turbines without dena**

- **Throat: Tonsils difficult to visualize, op clear without exudates, thrush**

- Absent tonsils would suggest a severe defect in lymphocyte number

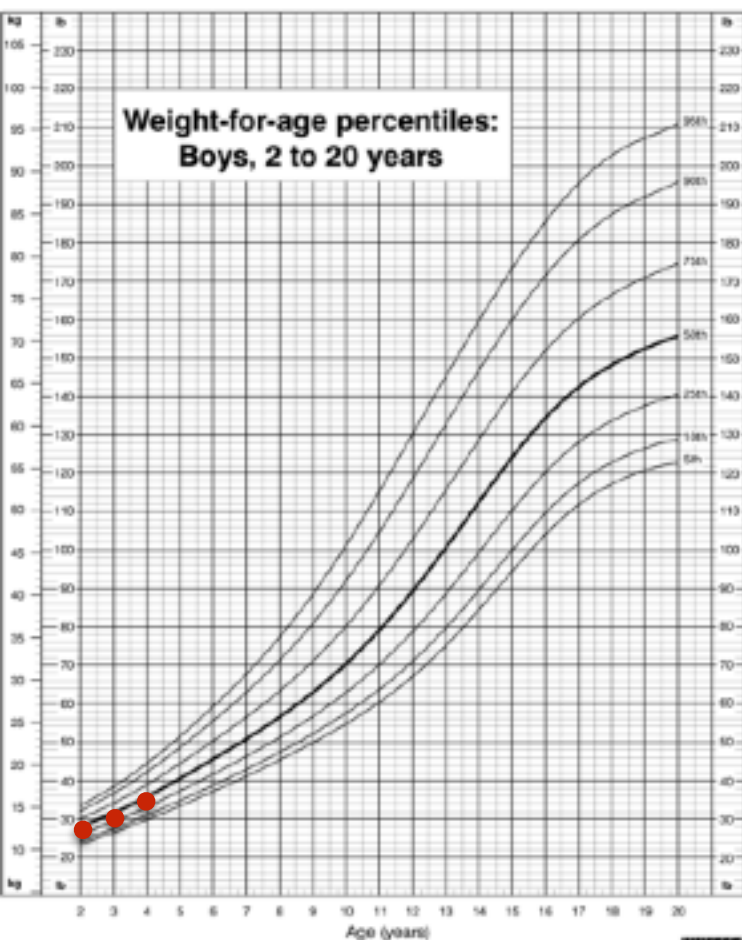

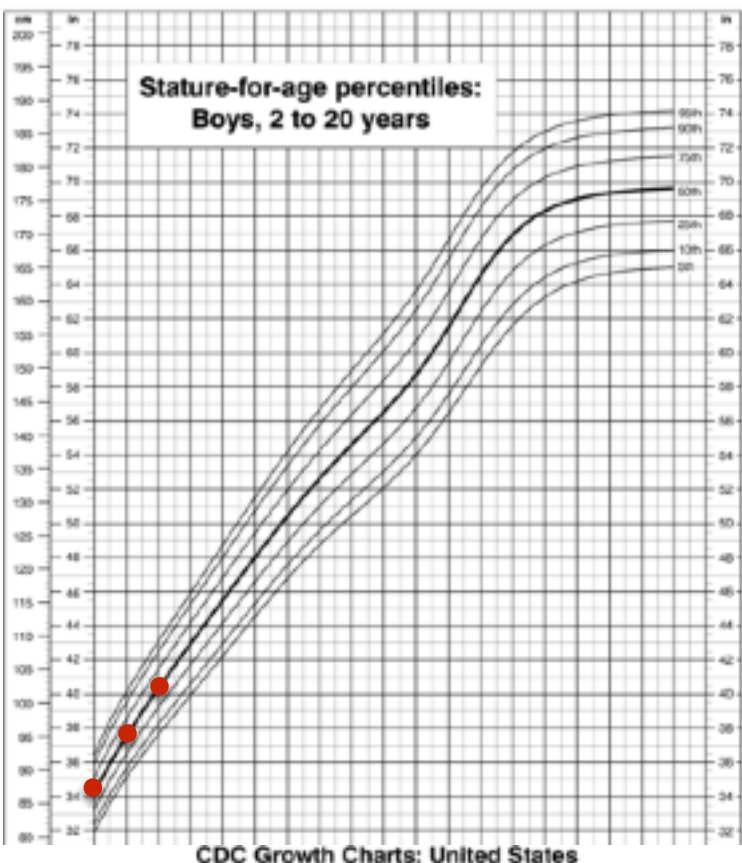

- **Neck/Lymph: Supple, no lymphadenopathy (LAD)**

- LAD in the absence of infection may suggest a lymphoproliferative component or dysregulated immune system

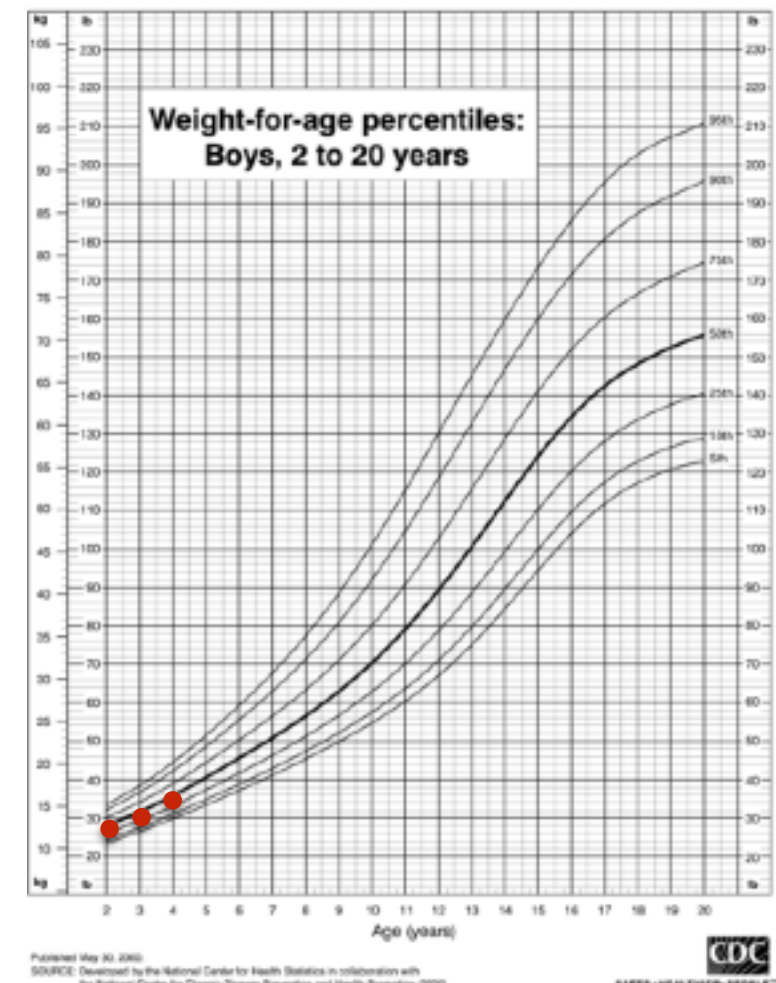

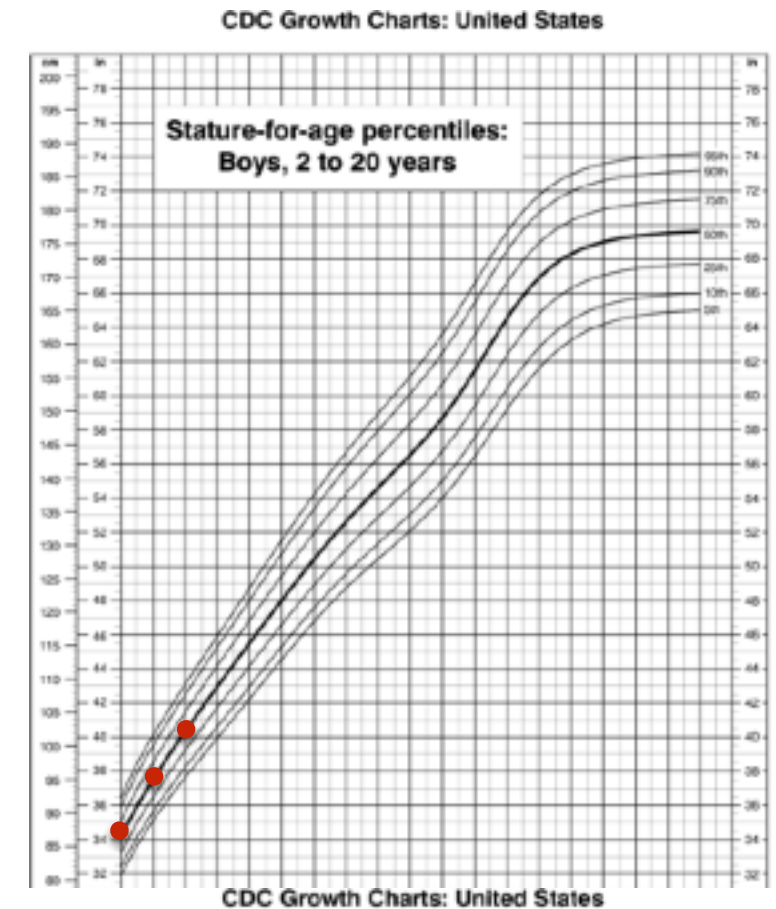

# CDC Growth Charts: United States

# Physical Exam - Part 1

- Temp: 98.8°F, BP 101/63 mmHg, Pulse 97, Ht 101.6 cm (40"), Wt 15 kg (33 lb 1 oz)
  - 50th percentile for height and 40th percentile for weight. No unexplained fever or Failure To Thrive
- Gen: WDWN well-appearing in NAD
- Head: Normocephalic without dysmorphic features
  - Facial dysmorphic features can be seen in DiGeorge Syndrome and of course other genetic diseases
- Ears: TMs well visualized without effusions
  - Scarred TMs would suggest severe/chronic ear infections
- Eyes: PERRLA, EOMI, no scleral injection
- Nose: Normal turbinates without edema
- Throat: Tonsils difficult to visualize, op clear without exudates, thrush
  - Absent tonsils would suggest a severe defect in lymphocyte number
- Neck/Lymph: Supple, no lymphadenopathy (LAD)
  - LAD in the absence of infection may suggest a lymphoproliferative component or dysregulated immune system
